

GMAX GP300 URI-MAX® MALE URINAL WITH LID

PATIENT SAFETY AND COMFORT

- Exclusive “calibrated neck” is a smooth molded rim which eliminates any burs, snags and sharp edges on the body opening which can contribute to patient injuries such as cuts, abrasions and scrapes on the penis, scrotal area and inner thighs
- Due to the unique production technology, this patented design does not require any additional trimming processes and eliminates the concern of patient injuries
- All Uri-MAX Male Urinals are Latex and BPA Free

MEASURED VOLUME

- 32 ounces/1 Liter 1000mL graduated volume in the body of the urinal, not including the handle

NURSING EFFICIENCY— BODY DESIGN

- The unique design offers increased stability and structural integrity incorporating multiple convex body ribbing and computer controlled wall thicknesses
- The handle design allows for use with all current bed rails including new wider top rails
- The attached lid will not slip or fall off the body of the urinal

COST SAVING CASE PACK

- The packaging design allows for optimized case pack which reduces storage space for each case and increases the number of cases in a truckload, thereby reducing freight costs
- A truckload will hold 840 cases or 40,320 Uri-MAX urinals, which is **25%** more than our competitor vendors

Realize potential **cost-savings**
with a patented urinal
manufactured by a certified MBE

If you have any backorders or supply
issues with your plastic urinals...
